

Arjun Mehta

Machine Learning Engineer | Synthetic sample with intentional ATS-style issues for testing red flags

Contact Hyderabad, India | arjun.mehta@example.com | LinkedIn available on request

Objective

Seeking a challenging and dynamic organization opportunity where I can grow and use my skills to contribute to an esteemed company.

Professional Summary

Machine Learning Engineer with 3+ years of experience in NLP, recommendation systems, model deployment, and data pipelines. Strong Python and SQL foundation with hands-on scikit-learn, PyTorch, FastAPI, Docker, AWS, and MLflow experience.

Skills

Python, Python, Python, Python, SQL, SQL, Machine Learning, Machine Learning, NLP, NLP, PyTorch, scikit-learn, FastAPI, React, PostgreSQL, MongoDB, Docker, AWS, Kubernetes, MLflow, Airflow, Git, Linux

Experience

ML Engineer | InsightLoop Analytics | Hyderabad | 2022-Present

Developed text classification and semantic matching models in Python and scikit-learn for support-ticket routing.

Built FastAPI inference services and Docker images for batch and online prediction.

Created feature pipelines with Airflow and PostgreSQL; tracked experiments with MLflow.

ML Engineer | DataPilot Labs | Hyderabad | 2019-2021

Built recommendation and churn models using Python, SQL, scikit-learn, and PyTorch.

Worked with AWS and Kubernetes for model-serving infrastructure.

Career Break

Unemployed / career break during 2021-2022 while completing independent study and personal projects.

Projects

NLP Hiring Assistant - Python, NLP, scikit-learn, FastAPI. Built a text matching service that ranked candidate profiles against role descriptions.

Vision Quality Monitor - PyTorch, OpenCV, Docker. Prototype image classification pipeline for manufacturing inspection.

Education

B.Tech., Computer Science | Demo University | 2019
